(a) $\boldsymbol{\Omega} = \Omega_x \mathbf{e}_x$: fold

$\Delta u_y = -\Omega_x z$, $[\![w_y]\!] = \Omega_x$

(b) $\boldsymbol{\Omega} = \Omega_y \mathbf{e}_y$: tear

$\Delta w = -(x - c)\,\Omega_y$

(c) $\boldsymbol{\Omega} = \Omega_z \mathbf{e}_z$: in-plane

$\Delta u_y = (x - c)\,\Omega_z$
